

One Million Bales To Be Wrapped In Cotton Fab- ric; AAA Approves Plan

The Kinston schools will open Monday, September 12, for the 1938-39 session, according to H. B. Larkins, principal.

Members of the high school faculty will be at the school building on Friday, September 9, for the purpose of registering pupils. All pupils who are able to do so should make special effort to register on

Friday. Classes in commercial subjects will be limited, so it will be necessary to register early for these courses.

The full faculty of high and elementary grades follows:

High School

J. M. Rash—Science and Mathematics.

E. C. Nevin—Social Science.

G. W. Hause—Science and Athletics.

W. E. Green—English.
Mrs. J. M. Rash—Junior High
English and Physical Education.
Rubye Lee Robinson—Home Ec-
onomics.
R. Tullos—Vocational Agricul-
ture.
Sarah W. Lee—Commercial.
Elementary School
Thomas Ziglar—Sixth Grade.
Myrtis Meacham—Fifth Grade.
Louise S. Larkins—Fourth
Grade.
Jessie Lee—Third Grade.

Nell G. Hause—Second Grade.
Eunice Finlayson—First Grade.
Agnes Talbot—First Grade.
Music
Dorothy Hatcher.

FIRST GINNING REPORT

The first ginning report released by the census bureau shows that there were 334 bales of cotton ginned in the county from the 1938 crop prior to August 16. On the same date last year there were 334 bales ginned.

Health Notes

A Health Department exists primarily for protection of the public from communicable diseases. These are frequently allowed to spread through improper preparation, storage or handling of food. It is therefore of paramount importance that it be clean and wholesome

The State Board of Health recently passed some strict regulations to guard against the spread of typhoid fever, trenchmouth, dysentery, syphilis and many other diseases. These regulations provide for sterilization of dishes and utensils and cleanliness of all operations wherever food is prepared.

The cafes, restaurants, drug stores and other establishments are given a food handling permit when all requirements are met.

This permit is without cost but is a requirement before an operating license is obtained. A score sheet is posted monthly in each establishment after inspection and the permit may be revoked whenever conditions become dangerous to the public.

Thirty-two establishments in

Office County have met all requirements, have applied for and received permits. Their cooperation in making conditions cleaner and safer is most commendable and each is listed as follows:

Boutwell's Bakery, Elba.
Apex Barbecue, Enterprise.
Enterprise Baking Co., Enterprise.

Banks Cafe, Elba.
City Cafe, Elba.
City Cafe, Enterprise.
Cotter's Cafe, Enterprise.
Dan's Place, Enterprise.
Dowling Cafe, Enterprise.
Hattaway's Cafe, Kinston.

Miller's Cafe, Elba.
 Morris & McCollough Cafe, Elba.
 Marsh Cafe, Enterprise.
 Talley's Cafe, Elba.
 Veal's Cafe & Market, Elba.
 Dixie Grocery & Market, Enterprise.
 Jitney Jungle, Enterprise.
 Lindsey's, Elba.

ZENS OF ELBA AND ITS

It will be our pleasure to serve you in any way we can. We want you to make use of our facilities, use our private rooms when needed, and call on us for help when we can be of assistance.

A NATIONAL SAFETY
LABORATORY

The use of the Baltimore-Washington Highway as a national laboratory of traffic safety has been proposed by the American Legion. It looks like an important, practical step in attacking the nation's traffic accident problem. Automobile fatalities in the United States numbered close to 40,000 in 1937.

The plan, as explained by Bruce T. Bair, retiring Commander of the Baltimore-Washington Highway, one of the most heavily traveled highways in the country, to be modernized to incorporate the most advanced methods in road design, construction and traffic planning.

It will be provided with personnel and funds to enforce traffic laws. It will be provided with personnel and funds to enforce traffic laws. It will be provided with personnel and funds to enforce traffic laws.

Because it leads to and from the nation's capital, this is about the one highway in the country which would attract widespread national interest. Every state might well develop similar model, safety highways, in the light of the experiments and experience developed here by the Federal government.

A. Harry Moore, Governor of New Jersey and Chairman of the President's Accident Prevention Conference, has assured the Legion of the interest of the Conference. The project has also been endorsed by Governor Niles of Maryland and others. It would seem appropriate that such a Federal safety laboratory should be established at the Capital's front door.

STATE AGAINST STATE

The Federal Constitution prevents individual states from direct-ly, by obstructing interstate commerce by tariffs or other means. There is a great need for the states to set up barriers to the free flow of trade across state lines, by indirect means.

Since the World War it has become obligatory in twenty-two states to have a preference to State or Territorial products and building materials. This has resulted in the awarding contracts for buildings, highways or other public works.

Twenty-seven States and one Territory have established the policy of awarding contracts for public works to the State or Territory. This has resulted in the awarding contracts for buildings, highways or other public works.

The police power has been exercised by States and Territories in a number of ways to check the influx of products from other States. Often the result has been to hamper the free movement of products with the industry of the State.

Many other practices of States recently resemble protectionist barriers in their effect—discriminatory taxation on premiums paid by insurance companies, or the State's ports of entry to tax and inspect trucks and buses from neighboring States, or the State's taxes on various products.

State or municipal statutes bearing heavily on large interstate organizations than on local stores of similar size. Such measures breed sectionalism, and if they should spread they would threaten the huge national market on which our prosperity to so large an extent depends.

CANADA A GOOD NEIGHBOR

Americans generally, of all degrees of political faith and affiliation, will heartily agree with President Roosevelt's expression of our national affection toward our sister nation to the North, the Dominion of Canada.

When Mr. Roosevelt said at Kingston, Ontario, "I give you my assurance that the people of the United States will not stand idly by if domination of Canadian soil is threatened by the hands of a few," he practically extended the whole American doctrine to cover the Canadian continent.

Popularly interpreted, that doctrine amounts to a declaration that the United States will not stand idly by if domination of Canadian soil is threatened by the hands of a few.

There is an inspiring word of hope for every troubled soul. You may as well face the fact that your life may be defeated. You may be utterly defeated. You may be utterly defeated.

Thousands of women have been helped by the use of the Elba Clipper. It is a simple and easy to use. It is a simple and easy to use.

No water being available in the house, a minister in Leeds, England, baptised the sick infant of Mrs. Robert Parton with beer.

FARMER JONES AND HIS
COW PEN

By JUDGE W. M. BRUNSON

BITTER WEEDS—For the past three years I have been trying to tell folks how to destroy bitter weeds. They know they have to, but they don't want to. I have learned by experience that the power needs to be used.

"Revels are costly. The spiritual awakening which our country is now passing through is a costly one. It is a costly one. It is a costly one.

"The response of the people was wholehearted. They were through. They were through. They were through.

"The response of the people was wholehearted. They were through. They were through. They were through.

STOWAW FARMER IS A FIRM
BELIEVER IN COVER CROPS

By JUDGE W. M. BRUNSON

GADSDEN, Ala.—Two enemies to successful farming—low pasture yields and soil erosion—have been driven from the farm of Mr. G. W. Colquhoun of Etowah County by the proper use of cover crops.

In 1925, the land farmed by Mr. Colquhoun produced only 11 bales of cotton on 25 acres, while average pasture yield of the same area was 15 bales. During that year none of the land was planted to cover crops. Most of the land was left bare to erosion and a large part of the rich top soil was washed off by water.

Realizing that a real problem faced him, the Etowah County farmer set about the task of doing something to improve the situation. He first terraced the farm.

For the first eight years all of the 25-acre farm, with the possible exception of a small area, was covered with a cover crop. Result is that in 1937 Mr. Colquhoun harvested 21 bales of cotton from 24 acres, and an average of 40 bales of corn per acre was produced. One block of his farm has made more than 1,000 pounds of cotton per acre.

Mr. Colquhoun is also improving his pasture land by planting a cover crop. He has planted a cover crop of clover and alfalfa. He has planted a cover crop of clover and alfalfa.

Mr. Colquhoun is also improving his pasture land by planting a cover crop. He has planted a cover crop of clover and alfalfa. He has planted a cover crop of clover and alfalfa.

Mr. Colquhoun is also improving his pasture land by planting a cover crop. He has planted a cover crop of clover and alfalfa. He has planted a cover crop of clover and alfalfa.

The FEUD at
SINGLE SHOT
By Luke Short

By JUDGE W. M. BRUNSON

FIFTEENTH INSTALLMENT
SYNOPSIS—With his partner, Roy Hand, Dave Turner is on his way to his ranch at Sealed. Both are returning from a long trip where they have served sentences for unjust convictions. On the train, which is carrying a large sum of money, Roy's quick action and straight shooting foil a hold-up while Dave saves the life of Martin Quinn, a gambler, who is being threatened by a desperado. Stopping at Single Shot, the sheriff tells Dave he is not wanted. Quinn defends Dave but Dave and Rand go to Sealed to meet Mary, Dave's sister and proceed on horseback to the ranch. Mary reveals she is married and tells Dave that the ranch is doing poorly. He is being harassed and involved in a claim dispute.

Shaken by a shot from the darkness, Dave rode from his horse, leaving the reins to his partner. He pulled them out and pulled them out. He pulled them out and pulled them out.

He turned to the horse standing in the sun. Dave mounted the horse and pulled the canteen from the saddle horn. After the first drink he passed, then took a deep draught, which strengthened him.

He turned to the horse standing in the sun. Dave mounted the horse and pulled the canteen from the saddle horn. After the first drink he passed, then took a deep draught, which strengthened him.

CANNING RUBEL
FOR BABY GIVEN

By JUDGE W. M. BRUNSON

AUBURN, Ala.—A plan to feed baby out of a can instead of a bottle, that will save some of the farm family's expense for baby food, has been suggested by a specialist of the state extension service, announced a coming budget that contemplates a half pint tomato juice, 20 half pint carrots, 10 half pint spinach, 5 half pint English peas, 5 half pint asparagus.

"The baby needs additional vitamins and vitamins to supplement those in milk and it is economy on the part of the farm mother to conserve a well chosen variety of these elements when fresh vegetables are available," the specialist said.

Miss Curtis says the baby during the first year would need a course of vitamins. The equal parts of the vegetables would be in containers and process the same as in canning food for adults.

"I've got to drink," he thought dizzily, sitting on the ground. Crawling over to Lew's horse, he pulled the canteen from the saddle horn. After the first drink he passed, then took a deep draught, which strengthened him.

He turned to the horse standing in the sun. Dave mounted the horse and pulled the canteen from the saddle horn. After the first drink he passed, then took a deep draught, which strengthened him.
